EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe Wrkich on 09 July 2007.

The application has been amended as follows:

Claim 1 (AMENDED)

Replace the limitation: "generating means for generating update management data when the update management data is not provided with installed software" with:

"generating means for generating update management data, the update management data indicating a timing cycle based on a nature of installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with the installed software;"

Replace the limitation: "judging means for judging, on a cycle determined based on a nature of the installed software, whether among said installed software,

there exists software for which a presence of updates needs to be confirmed;”
with:

“judging means for judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;”

Claim 6 (AMENDED)

Replace the limitation: “generating update management data when the update management data is not provided with installed software” with:

“generating update management data, the update management data indicating a timing cycle based on a nature of installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with the installed software;”

Replace the limitation: “judging, on a cycle determined based on a nature of the installed software, whether among said installed software, there exists software for which a presence of updates needs to be confirmed;” with:

“judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;”

Claim 7 (AMENDED)

Replace the limitation: “generating update management data when the update management data is not provided with installed software” with:

“generating update management data, the update management data indicating a timing cycle based on a nature of installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with the installed software;”

Replace the limitation: “judging, on a cycle determined based on a nature of the installed software, whether among said installed software, there exists software for which a presence of updates needs to be confirmed;” with:

“judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;”

Claim 9 (AMENDED)

Replace the limitation: “generation unit configured to generate update management data when the update management data is not provided with installed software” with:

“generation unit configured to generate update management data, the update management data indicating a timing cycle based on a nature of

Art Unit: 2193

installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with the installed software;"

Replace the limitation: "judging unit configured to judge, on a cycle determined based on a nature of the installed software, whether among said installed software, there exists software for which a presence of updates needs to be confirmed;" with:

"judging unit configured to judge, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;"

Claim 12 (NEW)

An electronic device for executing a process in accordance with update confirmation information regarding a presence or absence of updates for predetermined software supplied from an update data supplying apparatus via a network, wherein said electronic device comprises:

generating means for generating update management data, the update management data indicating a timing cycle based on a nature of the installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with installed software;

storage means for storing said update management data generated by said generating means;

judging means for judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;

detection means for detecting said update data supplying apparatus to which an inquiry is to be made on the presence of updates for said software for which said judging means has judged a confirmation to be necessary;

inquiring means for making an inquiry on the presence of updates for said software to said update data supplying apparatus detected by said detection means; and

execution means for executing a process based on said update confirmation information supplied from said update data supplying apparatus in response to said inquiry made by said inquiring means.

Claim 13 (NEW)

An information processing method of an information processing apparatus which executes a process in accordance with update confirmation information supplied from an update data supplying apparatus that supplies via a network said update confirmation information regarding the presence or absence of updates for predetermined software, comprising the steps of:

generating update management data, the update management data indicating a timing cycle based on a nature of the installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with installed software;

storing said update management data generated by said generating;

judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed;

detecting said update data supplying apparatus to which an inquiry is to be made on the presence of updates for said software for which said judging has judged a confirmation to be necessary;

making an inquiry on the presence of updates for said software to said update data supplying apparatus detected by said detecting; and

executing a process based on said update confirmation information supplied from said update data supplying apparatus in response to said inquiry made by said inquiring.

Claims 1, 2, 6, 7, 9 and 12-13 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest generating means for generating update management data, the update management data indicating a timing cycle based on a nature of the installed software and for confirming the presence of updates for the installed software, when the update management data is not provided with installed software; storage means for storing said update management data generated by said generating means; judging means for judging, based on said update management data whether or not, among said installed software, there exists software for which a presence of updates needs to be confirmed by an electronic device in relation to a update data supplying apparatus, as recited in independent claims 1, 6, 7, 9 and 12-13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
